Mindful

Mental Health & Wellness App

UI Design Document

Version 1.0 · April 2026

Platform

iOS · Android · Mobile Web

1. Design Overview

This document defines the visual language, component system, layout rules, and screen specifications for the Mindful mental health mobile application. It serves as the single source of truth for all UI implementation decisions.

1.1 Design Goals

- Create a calming, non-clinical visual environment that reduces anxiety
- Use soft gradients and rounded shapes to convey safety and warmth
- Ensure high readability with generous whitespace and accessible typography
- Provide clear information hierarchy without overwhelming users
- Maintain consistency across all screens through a unified design system

1.2 Design Principles

Calm First — Every interaction is designed to reduce cognitive load, not add to it. Transitions are gentle, animations are slow and purposeful, and destructive actions are never one tap away.

Human-Centered — Language is warm and non-judgmental. Labels use plain English, not clinical terms. The UI celebrates small wins and uses encouraging microcopy throughout.

Accessible by Default — Color contrast meets WCAG AA at minimum. Touch targets are no smaller than 44px. Text sizes are user-adjustable. All icons include visible labels.

Privacy-Aware — The UI communicates data safety at critical moments. Lock icons, privacy prompts, and confirmation dialogs are built into the design system.

---

2. Visual Identity

2.1 Color Palette

The palette is built around soft, desaturated purples and teals with warm accent notes. Avoid pure black or aggressive reds in UI contexts — reserve high-contrast elements for accessibility needs only.

Primary	**Lavender Purple**	`#6B5CE7`	CTAs, active nav, selected states, key headings
	Soft Lavender	`#E8E4FF`	Backgrounds, card fills, hover states

	Mint Teal	#4ECDC4	Progress indicators, wellness streaks, positive feedback
	Rose Pink	#FF6B9D	Mood indicators (low/stressed), alerts, highlights
	Warm Peach	#FFB347	Achievements, warm affirmations, notifications
	Background	#F9F7FF	App-wide page background, section fills
	Text Primary	#2D2B55	Headlines, labels, high-emphasis body copy
	Text Secondary	#6B6890	Subtitles, placeholder text, metadata

2.2 Typography

The app uses a two-family system: a rounded humanist sans-serif for UI copy and a clean monospace for data display (streak counts, timers, stats).

Role	Size / Weight	Line Height	Usage
Display / Hero	34px · 700	40px	Onboarding hero text, large motivational messages
H1 Screen Title	28px · 700	34px	Primary screen headings
H2 Section Title	22px · 600	28px	Card headings, section labels
H3 Subtitle	18px · 600	24px	Sub-sections, dialog titles
Body Regular	16px · 400	24px	Main content, descriptions
Body Small	14px · 400	20px	Supporting text, metadata
Caption	12px · 400	16px	Labels, timestamps, footnotes
Button Label	16px · 600	24px	All interactive button text
Stat / Counter	32px · 700 Mono	38px	Streak counts, timers, progress numbers

2.3 Iconography

- Style: Rounded, 2px stroke weight, no sharp corners
- Grid: 24x24px base, with 2px safe zone — effective visual area 20x20px
- Source library: Lucide Icons or Phosphor Icons (rounded variant)
- All icons must appear with a visible text label in navigation contexts
- Active state: filled variant of icon + primary color fill
- Inactive state: outline variant + secondary text color

3. Spacing & Layout System

3.1 Spacing Scale

All spacing is based on a base-4 system. Use only values from this scale to maintain visual rhythm.

Token	Value	Usage
`space-1`	`4px`	Icon gap, inline indicator spacing
`space-2`	`8px`	Compact element spacing, icon padding
`space-3`	`12px`	Input field inner padding
`space-4`	`16px`	Standard component gap, list item padding
`space-6`	`24px`	Card internal padding, section item spacing
`space-8`	`32px`	Section vertical gap, dialog padding
`space-12`	`48px`	Large section breaks, hero spacing
`space-16`	`64px`	Screen-level vertical rhythm

3.2 Grid & Frame

- Screen margin: 20px horizontal on all screens
- Content max-width: 375px (based on iPhone 14 Pro reference frame)
- Column grid: 4-column flexible grid within content area
- Gutter: 12px between columns
- Bottom navigation bar height: 80px (including safe area)
- Top header height: 56px standard / 96px with search input
- Card border radius: 20px (large), 12px (medium), 8px (small chip)

3.3 Elevation & Shadows

Depth is communicated through soft layered shadows, never hard outlines. Cards float above the background with a subtle shadow diffused across a large radius.

- Level 0 — No elevation: background fills, list rows
- Level 1 — Light card: 0 4px 16px rgba(107,92,231,0.08) — standard content cards
- Level 2 — Raised card: 0 8px 32px rgba(107,92,231,0.14) — modals, bottom sheets
- Level 3 — Floating: 0 16px 48px rgba(107,92,231,0.20) — overlays, toasts

4. Component Library

4.1 Buttons

Primary Button

- Background: Lavender Purple #6B5CE7 with soft inner glow
- Text: White, 16px Semi-Bold
- Border radius: 16px (pill-like)
- Height: 56px, minimum width: 160px
- Padding: 16px horizontal
- State — Pressed: scale(0.97) + darker shade #5A4DD6
- State — Disabled: #B8B0F0 background, no interaction

Secondary Button

- Background: Soft Lavender #E8E4FF
- Text: Lavender Purple #6B5CE7, 16px Semi-Bold
- Border: 1.5px solid #D0C8FF
- Same sizing as Primary

Ghost / Text Button

- No background, no border
- Text: Primary Purple or Secondary text color
- Used for low-priority actions: Skip, Cancel, Learn More

4.2 Input Fields

- Height: 56px
- Background: White with 1.5px border #E0DCFF
- Border radius: 14px
- Focus state: 2px border #6B5CE7 + soft purple glow (box-shadow: 0 0 0 4px rgba(107,92,231,0.15))
- Error state: 2px border #FF6B9D + error message below in Rose Pink
- Placeholder text color: #B0AECA
- Label: 12px Regular, positioned above field

4.3 Cards

Standard Content Card

- Background: White, border-radius 20px, Level-1 shadow
- Internal padding: 20px all sides

- Title: H2 style (22px Semi-Bold)
- Divider between sections: 1px #F0ECFF hairline

Mood Card

- Gradient background from Soft Lavender to White
- Emoji display: 48px centered
- Mood label: 14px Regular below emoji
- Selected state: purple border 2px + soft shadow

Session / Therapy Card

- Left accent bar: 4px wide, Teal #4ECDC4
- Avatar: 48px circle, right-aligned
- Tag chip: 12px rounded, category color fill
- Duration and rating shown in metadata row

4.4 Bottom Navigation

- 5 tabs: Home, Journal, Sessions, Progress, Profile
- Active tab: filled icon + Primary Purple label
- Inactive tab: outline icon + Secondary text color
- Tab bar background: White with Level-2 shadow from top
- Notification badge: Rose Pink circle, 18px, top-right of icon
- Safe area respected — content not obscured on iPhone notch devices

4.5 Mood Tracker Widget

- 7 circular emoji mood buttons in a horizontal scroll row
- Each button: 52px circle, soft fill matching mood valence
- Selected button: 2px Purple ring + scale(1.15) + label visible
- Unselected buttons fade to 60% opacity when one is selected
- Animated pulse on first render to draw attention

4.6 Progress Ring

- SVG arc component, 120px diameter reference
- Track color: #F0ECFF (unfilled)
- Progress color: Teal #4ECDC4 for positive metrics, Purple for completions
- Stroke width: 8px
- Center label: stat number in Mono style + small unit label below
- Animated on screen entry: arc draws from 0 to value over 600ms ease-out

4.7 Toast & Notification Banners

- Position: Bottom of screen, 16px from bottom nav
- Border radius: 16px, Level-3 shadow
- Icon + message text side by side
- Auto-dismiss after 3 seconds with slide-down animation
- Types: Success (Teal left border), Warning (Peach), Error (Rose), Info (Purple)

---

5. Screen Specifications

5.1 Screen Inventory

The following table summarizes each primary screen, its key UI elements, and critical design notes.

Screen	Key UI Elements	Design Notes
Onboarding — Welcome	Hero illustration, Display text, Primary CTA, Step dots	Full-bleed gradient bg, no navigation bar
Onboarding — Goals	Selectable goal chips (multi-select), progress bar top, Continue CTA	Chips use secondary button style; selected = primary fill
Onboarding — Profile Setup	Name input, avatar picker, age slider	Minimal chrome; gentle illustration right-aligned
Home / Dashboard	Greeting header, mood check-in row, Today's Plan cards, Streak widget	Card-heavy layout; soft purple header gradient fades into white
Mood Check-In	7 emoji buttons, optional journal prompt, slider intensity scale	Full-screen modal; calming animation on open
Journal	Entry list (reverse chrono), FAB to add, filter chips by mood/tag	Entry previews show mood emoji + first line of text
New Journal Entry	Rich text input, mood tag, media attach, save button	Minimal distraction-free layout; auto-save indicated
Sessions / Explore	Search bar, category tabs, horizontal session carousels	Tab bar includes: All, Meditate, Breathe, CBT, Sleep
Session Player	Audio waveform, play/pause, timer, background scene illustration	Immersive full-screen; system UI hidden in playback mode
Progress	Weekly mood chart, streak ring, habit completion bars, insights	Charts use Teal + Purple; empty states are illustrated, not text-only

Screen	Key UI Elements	Design Notes
Profile	Avatar, name, settings list, membership badge, logout	Segmented into grouped setting rows with chevrons
Settings — Privacy	Data controls, biometric lock toggle, export data CTA	Lock icon prominently placed; plain-language descriptions
Therapist Match	Filter bar, therapist cards (photo, specialty, rating, price)	Cards use left Teal accent; available badge in top-right

5.2 Home / Dashboard — Detail Spec

The dashboard is the most visited screen and sets the emotional tone for each session. Layout follows a vertical scroll with three zones.

Zone	Specification
Zone 1 — Header (fixed)	Greeting text (H1) + user first name, notification bell icon (top right), date subtitle (caption). Background: gradient from #E8E4FF to transparent over 96px.
Zone 2 — Mood Check-In	Full-width card (Level 1 shadow). If not checked in: prompt text + emoji row. If checked in: shows selected mood + affirmation message. Height: 120px standard, 80px compact post-checkin.
Zone 3 — Today's Plan	H2 heading + See All link (right-aligned). Vertical stack of Session Cards. Each card: 72px tall, left Teal accent, title, duration, and a play button.
Zone 4 — Streak & Stats	Horizontal row of 3 stat chips. Each chip: rounded rect, stat number (Mono style), label below, icon top-left. Chips: Current Streak, Minutes Today, Journal Entries.
Zone 5 — Explore Prompt	Carousel of category cards (horizontal scroll). Each: 140x100px rounded card with category gradient + white icon + label.

---

6. Motion & Animation

6.1 Principles

Animations should always feel purposeful and gentle. Avoid sharp snaps, bounces, or rapid transitions — these conflict with the app's calming intent.

- Default duration: 300ms for most transitions
- Long transitions (screen changes): 400-500ms
- Easing curve: cubic-bezier(0.4, 0, 0.2, 1) — standard material ease

- Breathing animations: sine wave, 4-second cycle, subtle scale 1.0 to 1.04
- Skeleton loaders: shimmer left-to-right, 1.5s loop

6.2 Screen Transitions

- Navigation push: new screen slides in from right (x: 100% to 0)
- Modal open: slides up from bottom with backdrop fade-in
- Tab switch: cross-fade at 250ms, no sliding
- Onboarding steps: fade + slight upward drift (y: 8px to 0)

6.3 Micro-interactions

- Button press: scale(0.96) at 80ms, spring release to 1.0
- Mood select: selected emoji scales to 1.2 + ripple outward
- Progress ring: arc draws on mount, 600ms ease-out
- Streak increment: counter ticks up digit by digit
- Successful save: checkmark morphs from spinner over 400ms

---

7. Accessibility

7.1 Color Contrast

- All body text on white backgrounds: minimum 4.5:1 contrast ratio (WCAG AA)
- Large text (18px+ Regular or 14px+ Bold): minimum 3:1
- Purple #6B5CE7 on white: 4.7:1 — passes AA
- Never convey meaning through color alone — always pair with icon or text

7.2 Touch Targets

- Minimum touch area: 44x44px on all interactive elements
- Small icons visually may have larger invisible tap areas (padding)
- Bottom nav tabs: full-height tap zone, not just icon area

7.3 Screen Reader Support

- All images and illustrations include descriptive accessibilityLabel
- Interactive elements include accessibilityRole (button, tab, etc.)
- Dynamic content updates announced with accessibilityLiveRegion
- Focus order follows visual reading order top-to-bottom, left-to-right

7.4 Text Sizing

- All font sizes respond to system Dynamic Type / font scaling settings
- Minimum font size in production: 11px (captions only)
- Line heights increase proportionally with text scaling
- Card layouts reflow gracefully up to 200% text scale

---

8. Handoff & Implementation Notes

8.1 File Structure

- Design source: Figma (main file link in project Notion)
- Component library: Published as a shared Figma library
- Assets exported at 1x, 2x, 3x PNG + SVG for all icons
- Design tokens exported as JSON for both iOS and Android

8.2 Developer Notes

- Use React Native with styled-components or NativeWind for token application
- All gradients defined as LinearGradient with exact stop values in tokens
- Shadows use platform-specific implementations (iOS shadow props, Android elevation)
- All animations use react-native-reanimated v3 for 60fps performance
- Haptic feedback on all primary CTAs and mood selections (light impact)

8.3 QA Checklist

- Verify all screens on iPhone SE (375px) and iPhone 14 Pro Max (430px)
- Test dark mode — ensure all custom colors have dark-mode variants
- Verify keyboard avoidance on all form screens
- Check safe area insets on all full-screen screens
- Run Accessibility Inspector on each screen before release
